

# concept21® star

Newspaper press operators face these challenges every day — constantly trying to keep all the balls in the air. Mistakes can delay the print job, wasting precious time and costly resources.

## **RBP Chemical Technology's Concept 21 5 Star fountain solution system can be your solution.**

Concept 21 5 Star is a unique fountain solution delivery system that more precisely controls the chemistry on press. Super concentrated chemistry, combined with a unique, precision proportioning pump, yields more consistent and predictable results in the pressroom. You can count on Concept 21 5 Star to deliver optimal on-press performance, less waste and reduce your environmental footprint.

*In today's tough printing climate, newspaper pressroom managers face ever greater business challenges...*

- You need to reduce production costs...
- You must eliminate waste...
- You can't sacrifice print quality...
- Job make ready and changeover must be done now...
- You need to control VOC emissions and print "greener!"

### **concept21® 5 Star**

- Improves print characteristics — by providing a consistent press mix, which means a cleaner printed sheet, with less tinting and toning, better ink densities and reduced biological growth.
- Provides greater control of ink and water balance to print more consistent solid ink densities using less ink and reduced water consumption
- Reduces fountain solution consumption by more than 50%
- Allows quicker and cleaner startups and restarts for less paper waste
- Reduces risk of biological growth with accurate dosage of concentrated chemistry
- Reduces your environmental impact — less product shipped, stored, handled, consumed and emitted

#### **Concept 21 5 Star — the newsprint solution...**

Tighter control than ever before  
+ unique concentrated chemistry  
= Improved Production Output, Reduced Total Operating Costs and a Greener Pressroom.
