

**PC 400** A more powerful version of our popular ON THE FLY plate cleaner. Effective in the toughest situations on baked, digital plates.

▲ **ON THE FLY** High performance, low VOC, all-purpose alkaline cleaner and conditioner. Achieves clean startups on both web and sheet-fed presses.

▲ **RE-NU** Powerful alkaline formula for cleaning and restoring plates coming out of long-term storage. Great for background tinting and toning problems on press.

**HYDRO CLEAN®** All-purpose acid cleaner for blinding problems on all plates.

**EZI-CLEAN** Multi-purpose acid emulsion cleaner and conditioner. Quick, clean startups with no greasy residue. Good for short-term storage of plates on press.

## Finishers/Cleaners

**PETRO GUM®** The industry standard asphaltum gum emulsion for short and long-term plate storage.

**ASPHALTUM GUM** Multi-purpose gum emulsion for short-term plate storage and for removing ink and pin dot oxidation.

**AQUA SEAL** Non-asphaltum, non-solvent, low VOC formula for short and long-term plate storage.

▲ **PLATE FINISHER AND PRESERVER** Excellent for storing and preserving silver emulsion plates.

▲ **APEX GOLD** For use on all types of processors. Compatible with all metal plates, including digital CTP types. Provides quick, clean start-ups and excellent protection from fingerprints.

▲ **APEX PLATINUM** Scratch resistant, superior finisher for use in all types of processors. Compatible with all metal plates, including digital CTP types. Provides quick, clean start-ups.

▲ **HEADLINE GUM FINISHER** Pure gum arabic solution with additional acids for quick, clean startups in newsprint applications.

▲ **GUM ARABIC 14°Be** Pure gum arabic for superior desensitizing. Contains biocides to control growth.

## Fountain Additives

**ANTIFOAM** Eliminates foaming problems in high agitation recirculating systems.

**CAL FREE** Prevents calcium buildup that can cause problems such as blinding, picture framing and plugged half tones.

**PLATE DESENSITIZER** Desensitizes and cleans to keep shadows and reverses open.

**PLASTIC PLATE DESENSITIZER** Prevents scumming and tinting problems on plastic and polyester plates.

**METALLIC INK DESENSITIZER** Keeps non-image areas free of sensitivity when running metallic inks.

**DRYING STIMULATOR** Promotes drying of conventional sheetfed inks. Extremely effective when printing on plastic and polyboard.

**GROWTH INHIBITOR** Helps eliminate biological growth. Excellent for use during problematic summer months.

**NON-PILING AGENT** Reduces paper lint and other buildup on blankets.

## Anti-Marking & Static Solutions

**SFS** Silicone finishing solution in a variety of concentrations. Available with antistat.

**STATIC FREE** Eliminates paper static to enhance delivery and jogging of the signature on web folders.

## Specialty Items

**BACK CYLINDER WASH** Removes hardened ink and contaminants from the impression cylinder, leaving no residue.

**BLANKET FIX** Fast drying formula that repairs and prolongs life of offset blankets. Raises low spots for uniform ink transfer.

**CHROME ROLLER CLEANER** Removes contaminants from the chrome roller while desensitizing the surface.

**SYSTEM CLEANER** Dampening system cleaner designed to remove lint, ink, bacterial growth and contaminants from the recirculation system of any press.

## Bindery Products

**SURE WASH** High flash point, non-abrasive formula excellent for cleaning ink, glue and adhesive buildup from bindery equipment.

## Fountain Concentrates

**CONCEPT 21™** Our unique color management tool designed to manage print characteristics on press by controlling the ink-water balance more precisely than ever before possible. Press operators have unprecedented latitude to compensate for changes before and during the press run, eliminating variation in the chemistry's performance. Available for both web and sheetfed applications.

## Web Presses Brush Dampening Systems

**AQUA SERIES 910** Standard fountain concentrate with reduced VOCs and no glycol ethers.

**AQUA SERIES 915** Same excellent characteristics as AQUA SERIES 910 with additives to eliminate calcium buildup on rollers, blankets and plates.

**AQUA SERIES 8200** Acidic concentrate designed to control piling and paper related problems on press. Compatible with all baked or unbaked CTP plates.

**NEWS FOUNTAIN MA** Mildly acidic concentrate for brighter, more vibrant colors in newsprint applications.

**UNITROL® 987** Premium formula for higher speed presses. Reduces ink buildup and contains additives to eliminate calcium buildup on rollers, blankets and plates.

**UNITROL® 9000** Formulated to perform with today's newest technologies. Minimizes attack on ink while keeping non-image area free of sensitivity.

## Continuous Dampening Systems

**UNITROL® CTP** Excellent for use with CTP plates on high speed presses.

**UNITROL® 924** Reduced VOC fountain concentrate designed to fight ink feedback on higher speed presses, especially those with duotrol dampening systems. Additives to eliminate calcium buildup on rollers, blankets and plates.

**UNITROL® 9000** Formulated to perform with today's newest technologies. Minimizes attack on ink while keeping non-image area free of sensitivity.

**UNITROL® 9500** Acidic fountain concentrate that effectively controls ink feedback and piling on press equipment with continuous dampening systems. This product is compatible with all types of plates and contains desensitizing agents that protect plates against oxidation to keep them printing clean.

## Spray and Conventional Dampening Systems - Neutrals/Alkalines

**AQUA SERIES 900 N** Zero VOC neutral concentrate designed for newsprint applications.

**AQUA SERIES 960 N** Economical neutral fountain concentrate for newsprint applications.

**NEWS FOUNTAIN MA** Mildly acidic concentrate for brighter, more vibrant colors in newsprint applications.

**AQUA SERIES 8200** Acidic concentrate designed to control piling and paper related problems on press. Compatible with all baked or unbaked CTP plates.

## Sheetfed Presses

### Two-Step

**AQUA SERIES 180** Standard all purpose reduced VOC fountain concentrate with additives to eliminate calcium buildup on rollers, blankets and plates.

**AQUA SERIES 910** Premium reduced VOC fountain concentrate. Effective with alcohol or alcohol replacers.

### One-Step

**UNITROL® 125** Contains additional desensitizers and buffers for achieving excellent print quality with CTP plates.

**UNITROL® 192** Acid based concentrate designed to keep metal and polyester plates running clean.

**UNITROL® 1000** One step fountain concentrate requiring no alcohol or alcohol replacers. Controls ink feedback and produces excellent results on a wide variety of dampening systems, including Heidelberg, Alcolor, Epic and Dahlgren.

**UNITROL® 1500** Contains additional drying stimulators for quick turnarounds. Very effective for use on KOMORI and MAN Roland presses.

**UNITROL® 1600** State of the art wetting system controls ink feedback, lowers water settings and provides excellent ink and water balance. Minimizes attack on newer paper stocks. Runs optimally on a wide range of sheetfed equipment, including Heidelberg presses with Alcolor dampening systems.

## Alcohol Replacers

**AQUANOL® 300** The high performance industry standard for slow to medium speed presses. Excellent for getting older equipment off alcohol.

**AQUANOL® 600** Concentrated formula for use on medium to high speed presses.

**AQUANOL® ZERO** Unique zero VOC non-solvent product for improving pressroom environment.

## Press Washes

### General Washes

**LOW ODOR ECONO WASH** High performance general press wash that quickly removes hardened ink and glaze leaving no residue.

**AQUA WASH** Excellent one-step water-miscible wash. Dilute up to 50% to reduce VOCs.

**GENERAL PRESS WASH** Economical all purpose wash and press cleaner.

**INSTA WASH** Fast drying formula for use on small to medium sized presses.

**KWIK WASH** Extremely fast drying formula for use on duplicator presses.

**CHEMSOLV** Low VOC, fast evaporating wash for small presses.

## Automatic Blanket Washes

**AUTO WASH 140** Contains no SARA Title III Section 313 reportable chemicals. Flash point over 140°F. Compatible with OXY DRY® automatic blanket washers.

**AUTO WASH 265** Ultra low VOC blanket and roller wash. Contains no HAPs or SARA Title III, Section 313 reportable chemicals. Flash point over 200°F.

**AUTO WASH 570** Reduced VOC, water emulsifiable blanket and roller wash designed for use in automatic equipment to effectively remove ink and contaminants quickly.

## Specialty Washes

**BLANKET CONDITIONER** The industry standard deep cleaning rubber conditioner and rejuvenator.

**COLOR CHANGE WASH** Non-separating, deep cleaning first step in a two-step color change system.

**CAL SOLV** Single step, all purpose wash for removing ink contaminants and calcium from blankets and rollers in one application. Safe for all press equipment.

**MRC ROLL CLEAN** Fast evaporating, non-chlorinated metering roller cleaner.

**SURE WASH** High flash point, non-abrasive formula for wet washing plates during make-ready or before applying storage gum.

**UV WASH AND UV WASH HF** Dissolves both oil and water-soluble contaminants for complete cleanup of UV inks and coatings. Low and high flash point versions available.

**UV WASH 5700** Reduced VOC, UV wash compatible with all types of rubber compounds used in UV applications. Contains no petroleum hydrocarbons.

**CAL FREE** Powerful formula for removing calcium glazing or buildup from rollers. Use for weekly maintenance to prevent calcium-related problems.

**NPR PLUS** Non-photochemically reactive wash designed for use on blankets and rollers. Excellent general purpose wash.

## Plate Cleaners

**DIGI PLATE CLEANER** Compatible with both baked and some unbaked CTP plates. Use on the fly or as a plate cleaner and desensitizer when the press is down.
